

The Age of Selfishness

How T.H.E.Y are going to make AI be smarter than HI.

* * * * *

BiO Spiritualism – Body, Mind and Spirit: Man’s Means, Nature’s Ends.

Body: *The Industrial Revolution*—a lever for man’s muscles. (1740 to 1970)

Mind: *The Information Age* – a lever for man’s mind. (1970 to 2023)

Spirit: *The Age of Selfishness* – a lever for man’s spirit. (2023 to infinity)

* * * * *

This should not be all that long of an article since the answer is all too clear.

That is, prior to the 1970’s it would have been a short article—probably even just one sentence—given the superior conscientiousness of human intelligence of the then still growing and developing Baby boomer generation. And notice, since I was leading edge BBG this is not about me entirely, but those who came after me who were *also* interested in personal growth and self improvement—just as those whom I came after encouraged me to be interested in the same thing.

Let me define my terms:

Conscientious as I am using it here means worshipping the *human potential* and doing one’s best to grow and develop same in self. For example (Immanuel Kant and his modern-day woke foot soldiers notwithstanding) based on what we know today—practically speaking—the human faculty we call reason has no limits.

Self improvement means being better tomorrow than you were yesterday at *making* yourself authentically happy so that you can live today the happy life *you* have created for your self so far. Since selfishness is the only way to do this, it makes selfishness a virtue—in this case, a cardinal virtue.

By AI, I mean Artificial Intelligence, which means machine intelligence, which means high functioning computer software.

By HI, I mean Human Intelligence, which means intelligence, which means the mental and physical ability that adult human beings have in order to *think* about the world in principles and *apply* those principles to one’s own self and one’s own life and succeed in *making* one’s own self be a Self that is authentically happy and fulfilled.

Notice the I *make* me happy and fulfilled—not a village, not a community, not any Group, but me, myself and I do this.

For example, let me—that is, me an [HI biologic](#)—define the use of my oft used pejorative term: T.H.E.Y, by excerpting Chapter 1 from my [Selfish 'ism](#) book that deals with what I mean by it:

T.H.E.Y

In a world that seems forever determined to deliberately destroy the individual's ego (if you doubt this, watch and listen to any of the Sunday morning clergy preaching to their faith-filled-flocks on TV once a week every Sunday Morning, week-in and week-out, week-after-week-after-week, 52 times a year, year-in and year-out, year-after-year-after-year; and/or look at Muslims who do the same kind of thing to themselves five times a day, day-in and day-out, day-after-day-after-day, Monday through Sunday for a minimum total of 35 times a week 1,820 times a year, year-in and year-out, year-after-year-after-rocking-back-and-forth-and-back-and-forth-in-the-never-ending-cycle-of-deliberately-destroying-egos-year) you have to preserve yours—or if necessary, resurrect yours—which is to say:

In a world (of the man-made) that is forever determined to deliberately destroy egos you preserve yours by starting and/or continuing to build your ego strength through ego-exercises (in the choice to exercise my capacity to think or not to exercise it, I choose to exercise it), then move on to increase your selfishness strength through selfishness-exercises (in the choice to feel or not to feel I choose to actually feel what *my* capacity to feel is feeling) and then go back-and-forth and back-and-forth in your own rational TFA (ThinkingFeelingActing) defensive countermeasures for self preservation, spiraling higher and higher beyond your destroyers reach and into the lap of your own luxurious being.

People who accept as the truth, the whole truth and nothing but the truth the claim that self-sacrifice is the highest ideal, end up being dedicated to destroying egos, to killing egos because ego is the only thing standing between them and their vision of a perfect world. By their own past choices, they have no current choice not to destroy egos (their future choices of course are still open, albeit, in inverse proportion to the degree of their “success”—high success at destroying their own ego, low desire to not destroy yours). Granted they all start with their own ego first and some never fully succeed in destroying it, but others of t.h.e.m do and so upon t.h.e.i.r success at destroying their own ego, t.h.e.y then are compelled to destroy yours least you remind them of the actual evil they have committed (against themselves) and so it becomes t.h.e.i.r mission in life to destroy you.

You as that inner three-dimensional-psycHological-mirror that T.H.E.Y can't stand to stand in front of. To do so is to face you: yu the judge, yu the jury and yu the executioner.

This is not fiction.

This is observable fact.

Introspectively observable fact.

For this reason, t.h.e.y are actively against introspection.

To preserve and protect your own ego becomes your immediate job and so in this regard you have to become your own policeman; an internal policeman dedicated to protect and serve: to protect your ego and serve your self.

Make no mistake about it, t.h.e.y are out to get you.

But.

Make not another mistake either. T.h.e.y are so easy to defeat it is almost a joke to even view them as an adversary once you see through t.h.e.i.r ways.

Granted, T(hey)H(ave)E(vil)Y(earnings) but since *true* evil is the absence of *true* good, to make the *real* good present in you all you have to do is *worship* reason and freedom.

Once this is done, T.H.E.Y are done.

So, continuing with the question of how are T.H.E.Y going to make AI smarter than HI:

By making *all* of tomorrow's adults—or at least 76% or more of today's children of the government controlled public school system be as dumb as the Axis Powers youth were in Germany and Italy and elsewhere during the rise therein of Nazi Socialism from the 1920's into the 1940's. Until that is, the heroic Adults throughout the Allies powers born and raised before me decided to put an end to the nonsense and did so.

So that today, we can say, thank our lucky stars for *them*.

For *them* that's protected the Constitutional Republic (not Democracy notice, but **Republic**) of the United States of America (no, I did not ask my ChatGPT Zleg to write this in the voice of Malcom Reynolds) by using retaliatory force against those Axis Dictatorships who initiated force in their attempt to gain world domination.

Just because the Axis Dictatorships lost World War II doesn't mean t.h.e.y and t.h.e.i.r kind went away—that t.h.e.y decided, Oh, we are Dictator scum, we're sorry ... [if I could do a Lewis Black standup bit here I would, but I can't so ... dunno ... move on ... maybe I'll try Zleg with this one? dunno, tbd.]

Evil neither takes nor gives breaks.

It's up to the good to put a stop to evil whenever and wherever it raises its ugly head.

Voila! Everybody in the public forum today—me included—fighting for our version of good over evil.

Since my good is good and yor good is evil—that is, *some* of those *undifferentiated* thoughts in me who know who T.H.E.Y are—“we” are forever locked in the eternal battle to have our good win over our evil. That's because as HI biologics that's the way we work (Epilogue, FREE copy here).

What did our Founding Fathers say?

"Eternal vigilance is the price of liberty."

Vigilance 2.0

Then, as AI computer software gets more and more “intelligent”—that is, higher functioning computer code—and adults get dumber and dumber, voila—you cross the Turing Line.

By Turing Line, I mean the point (shouldn't that be line?, not now) at which [lcd](#) (kws: “lowest common”) cultural pressures are so high and so widespread that even geniuses can't not succumb to the constant drumming into the mind of man to, kill the ego, kill the ego, kill the ego. (Dead egos don't give a s* about anything—least ways, about stopping those Collectivists who are trying to destroy the United States of America.)

Well, not all geniuses. That is, not all as long as physical force is banned from the process and each individual's right to be protected from physical force initiators is the political-economic norm. A right that modern day adult men and women give over by choice to their moral government: i.e., a government that is *dedicated* to protecting individuals from all thugs—thugs foreign and thugs domestic.

If this, then, the modern day [Brainiac-Nerds](#) efforts—some of the very ones who gave us these wonderful things called computers, t,h,e,i,r efforts—to convince us that AI computer code can be more intelligent than HI self-programming principles leaves one wondering, wtf is going on?

Is it simply that their self esteem is sooooo'oh low that they would crumble—literally, t,h,e,i,r internal irrational world view would collapse and they along with it—if they lost their nine figure incomes? Seems counterintuitive, but maybe not—t,h,e,y are HI biologics too don't forget, whether they admit it or not.

Why don't they stress the importance of children *learning* the basics and then learning how to learn? Then as the children grow and develop in their knowledge and understanding about the world that they have to survive in they can be for reason and freedom and not against it. If this were the case, then said children can also learn about and know human nature and how humans work and function. Then as they grow towards being authentically happy, fulfilled adults, they too can be part of the solution to protect all individuals' rights to life, liberty, property, and the pursuit of happiness.

Rather than the opposite: being a force for destroying our Republic of Constitutional Government designed to protect individuals against physical force initiators and secure our individual rights in the process. To destroy our Republic and make it be a Socialist or Communistic or some Statist form of Government that ultimately, inevitably will destroy individual rights and individuals along with it.

Once crossed—that is, the point reached, and the line crossed—by any given adult human being there may be no turning back for that human.

And when that human count gets to 76%, game over—The DIM Hypothesis comes to pass.

At that point who will really care that AI is smarter than dumbed down HI biologics.
